

Global Geography Trivia Game

6. When it is the first player's turn again, the player to his or her left must draw a card from the stack for the continent the first player is on. For example, if the first player landed on a North America space after his or her previous move, the question must come from the stack of North America question cards. NOTE: If the space is a special continent space outlined in red, skip to #7.

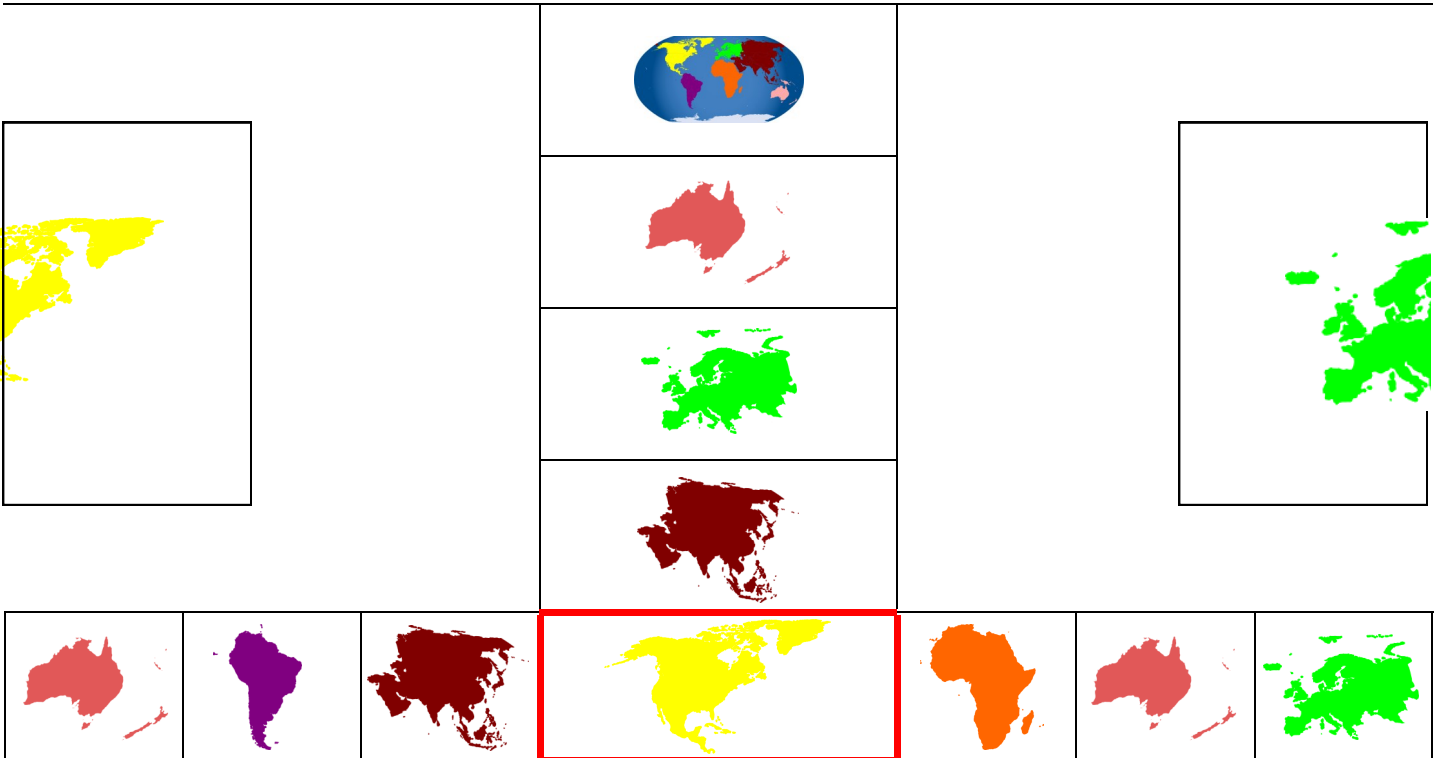

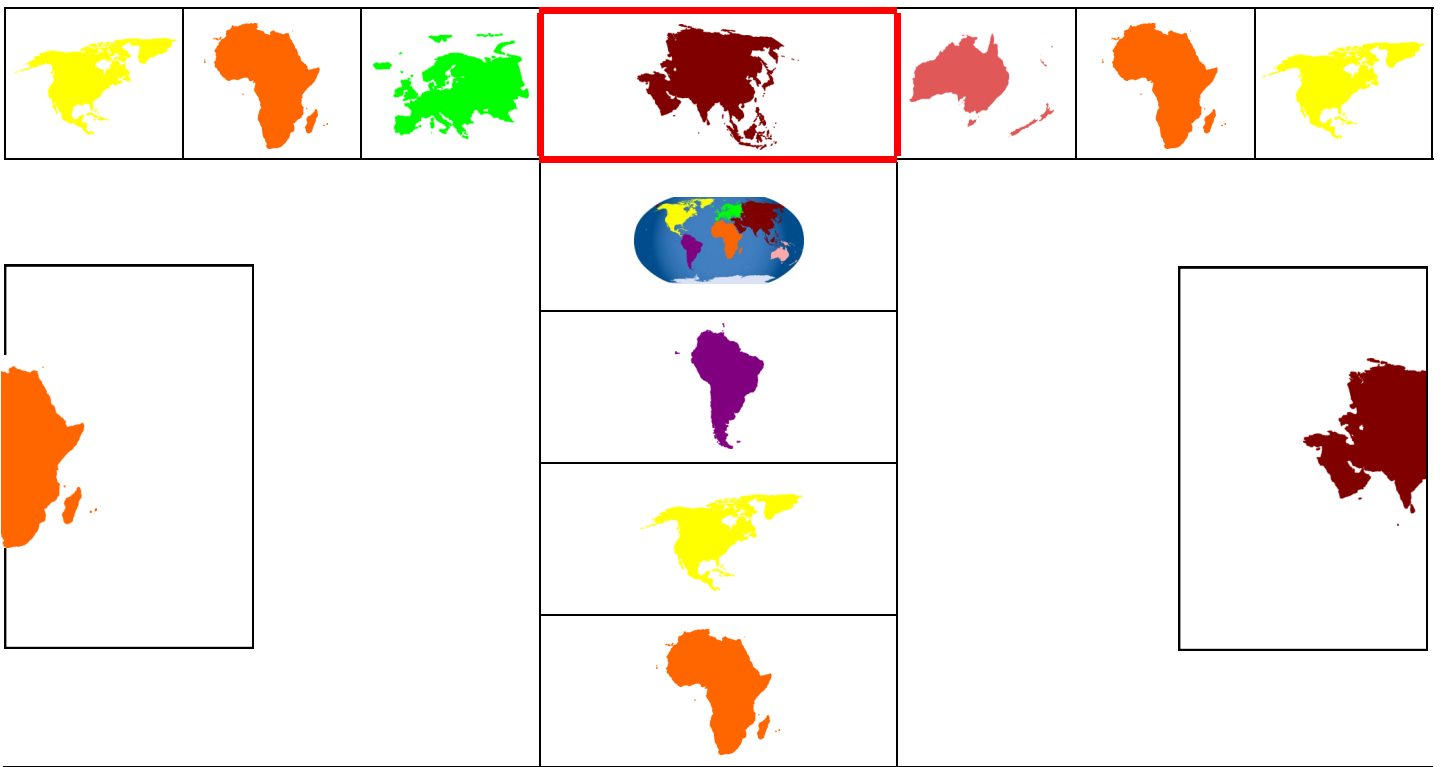

If the player answers the question correctly, he or she can roll the dice and move. After leaving the spoke that takes players from the center section of the board, players can move forward, backward, or both on a turn. For example, if a player rolls a three, he can move forward two and backward one if it helps him get closer to the space he wants to land on. If a player is on one of the spokes, he can only move forward. After reaching the outer section of the board, a player can move around the outside of the board or take a shortcut through the center to reach the continent he wants to land on. If he happens to land on the center section, he must answer a question from the center section card stack and go toward the continent as directed. Since this can help or hurt a player, he must decide whether to take that chance on the shortcut. If at any point a player answers a question incorrectly, he must stay where he is and answer a new question from that continent on his next turn.

Please note: Scattered throughout the board are spaces with a world map on them. If a player lands on this space, he can choose which continent he wants a question from.

7. When a player lands on a special continent space outlined in red, and answers the question correctly, he may take a matching continent card. The player then moves back to the center section without rolling the dice, and waits for his next turn. When his next turn comes, he answers a "Go to" question and moves toward the continent as instructed if he answered correctly. It does not matter if he already has that continent card; he must move in that direction to the outer portion of the board where he can resume his journey to the next continent card he hopes to win. Each time a continent card is won, the player must move back to the center section and start the process again until one player has won all six continent cards.

If the player answers a question wrong while on a special continent space, he does not receive a continent card and must move one space away from the special continent space. On his next turn, he must answer a question correctly in order to roll and try again to land on a special continent space.

The first player to win all six continent cards is the winner!
