Animal Behavior Terminology

Bioluminescence — Camouflage — Carnivore
Commensalism — Dominance — Dormancy — Estivate
Filter feeding — Foraging — Grazing

Bioluminescence	giving off of light by living organisms
Camouflage	disguise, such as color or shape, that conceals and helps protect
Carnivore	an animal that is mainly a meat-eater
Commensalism	organisms where one benefits from living off another without harming or helping it
Dominance	being in control or authority over another
Dormancy	being inactive at the present time
Estivate	to spend much of the summer in an inactive state
Filter feeding	eating by filtering food out of water that passes through an animal in some way
Foraging	searching for food
Grazing	eating food such as growing grass or other plants
