

# Spring

Sometimes, if you have a tree close by, you can watch when a bird builds a nest, lives in the nest, lays eggs, and then has little baby birds to take care of.

Cut out the pictures from the bottom of the page and paste them at the top of the page to show the steps from building a nest to having baby birds to take care of.

## Autumn (Fall)

In the fall, many animals stock up on food to get ready for winter. Squirrels love corn along with fruits, nuts, seeds, and many other things.

Cut out the pictures from the bottom of the page and paste them at the top of the page to show how the ear of corn would look before the squirrel starts eating it, how it looks after the squirrel eats a little of it, how it looks after the squirrel eats a little more, and how it looks after the squirrel is finished eating the corn.
