

# Human Anatomy and Diseases, Pt. 1 Notebook

We can learn about the body by organizing it into levels to study. What four levels (where each level is made of smaller parts) do scientists sometimes use?

Illustrate and label the four main types of tissues in your body. Summarize what you learned about each one.

Epithelial Tissue

-----

Connective Tissue

-----

Muscle Tissue

-----

Nervous Tissue

-----

What is the main job of the respiratory system? \_\_\_\_\_

---

---

Why do we need air to breathe? \_\_\_\_\_

---

---

---

---

---

What is the diaphragm? \_\_\_\_\_

---

Illustrate and label the parts of the nose, mouth, and pharynx shown in the unit. Summarize what you learned about the parts.

A large, empty rounded rectangular box with a black border, intended for a student to draw and label the parts of the nose, mouth, and pharynx. A large, light gray watermark reading 'SAMPLE' is oriented diagonally across the box.

Oral Cavity

-----

Nasal Vestibule

-----

Pharynx

-----

Nasopharynx

-----

Oropharynx

-----

Laryngopharynx

-----

What helps us filter dust, bacteria, viruses, and other substances out of the air we breathe?

---

---

Why is the opening in the bronchi so much smaller in someone suffering from asthma?

---

---

Draw and label two illustrations, one that shows the end of a healthy bronchi and one that shows signs of asthma.

What surrounds each lung? \_\_\_\_\_

---
