

What Is a Blizzard?

A blizzard happens when extremely cold air moves into an area where it has been a little warmer and when the air has enough moisture in it. When there is a blizzard, there is a tremendous amount of snow and lots of wind. It can be dangerous to go outside or to drive anywhere because it is so hard to see in the heavy, blowing snow.

Look at the pictures at the bottom of the page. Cut out the pictures that show a blizzard and paste them in the boxes at the top of the page.
