

Calla Lily

The calla lily is a type of calla, which is a flowerlike herb. Its funnel- or bell-shaped leaf is often white, and many people mistake it for the flower. The flowers are actually inside the leaf. The calla lily is a tropical calla that grows on the banks of the Nile River in Egypt. Other names for it are the Ethiopian lily or common calla. It has a 10-inch (25-centimeter) leaf.

Follow these instructions to draw a calla lily on the next page like the one shown below:

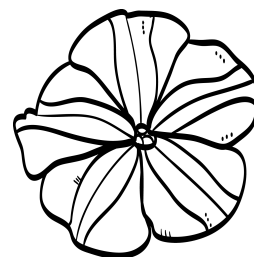

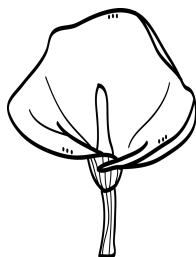

- Decide if you want to draw the right half of the picture or the left half of the picture and draw it in one of the first two grids. You can draw both if you'd like.
- Now, using a blank grid from the back of the book, try drawing the whole picture.

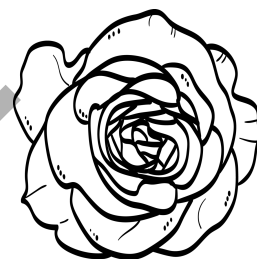

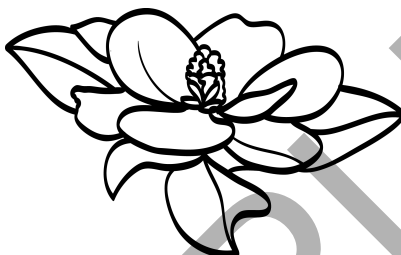

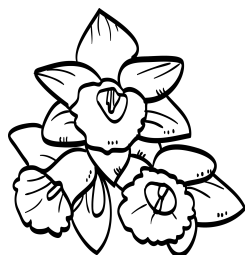

Questions

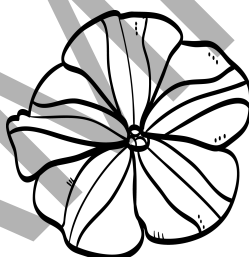

1. Which picture shows a tulip? Circle it.

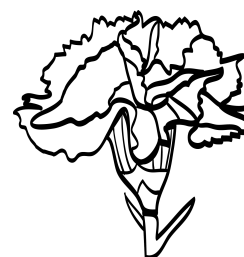

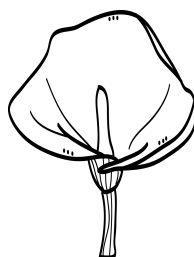

2. Which picture shows a narcissus? Circle it.

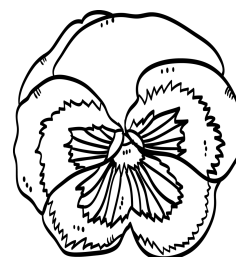

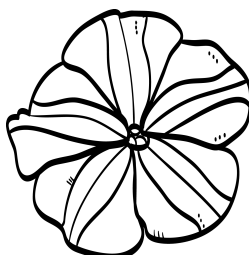

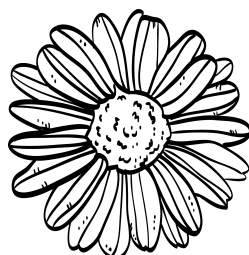

3. Which picture shows an iris? Circle it.

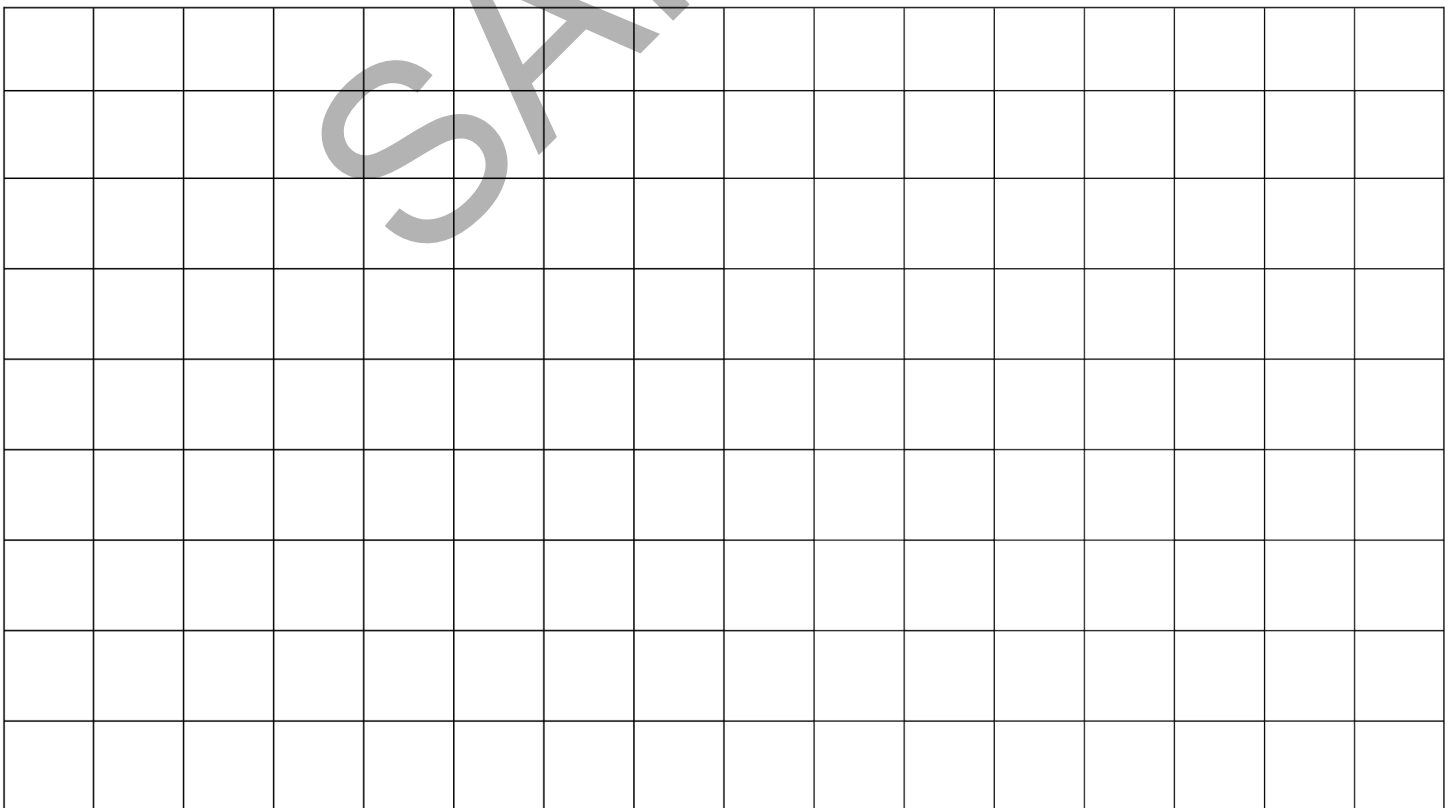

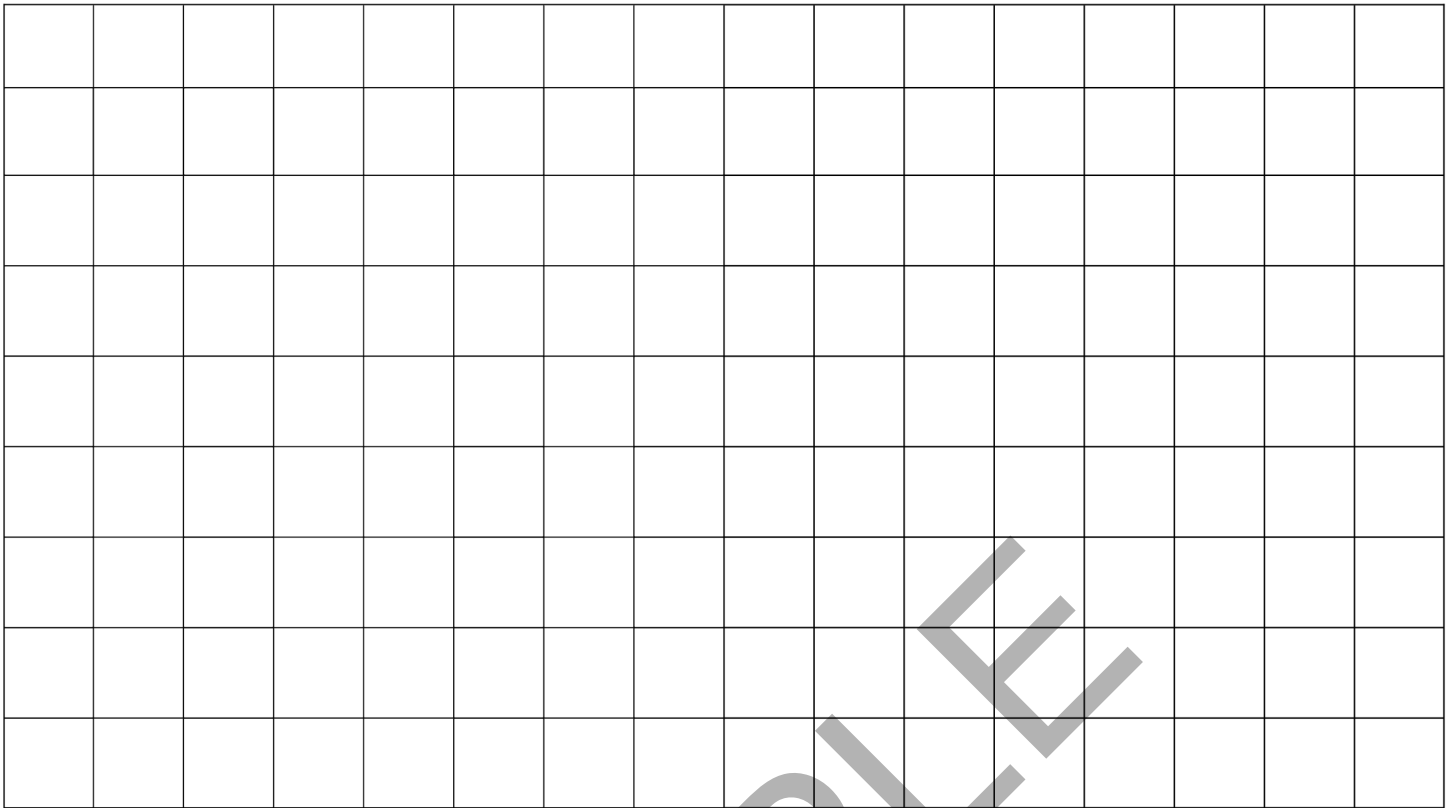

4. Which picture shows a calla lily? Circle it.

5. Which picture shows a petunia? Circle it.
