

Spring Alphabet: Letter A

Trace the sentence and then write it yourself on the next line. When you are finished, you can draw more ants on the ant hill and color the picture if you like.

A is for ant hill.

You and Your Friends

Do you like to help in the garden in the spring? Draw faces on the pictures below to make the people look like you or someone you know. You can color the pictures, too, if you like.

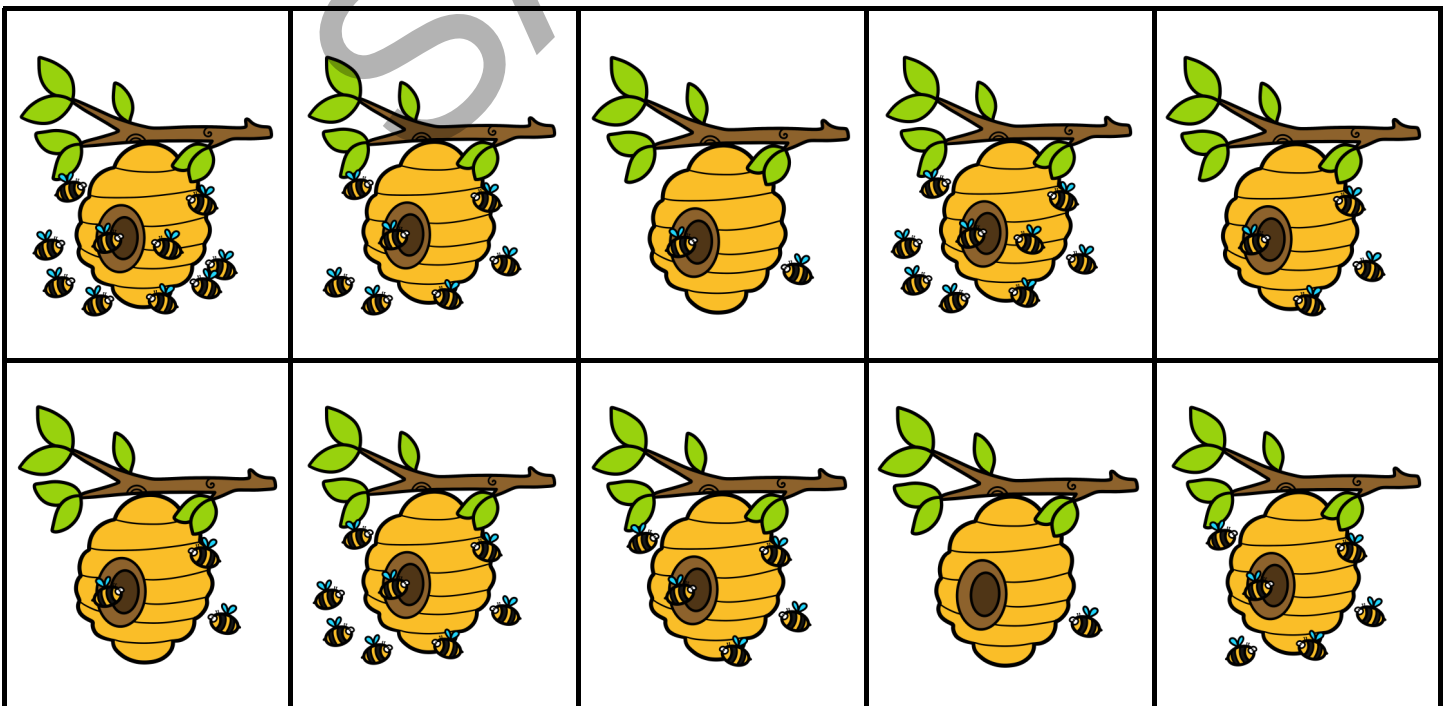

How Many Bees?

Look at the pictures below. Cut out the boxes with pictures of beehives. Count the number of bees in each picture and paste each picture in the box with the matching number.

1	2	3	4	5

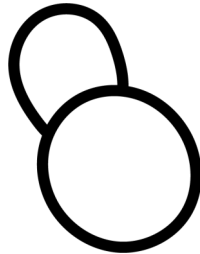

6	7	8	9	10

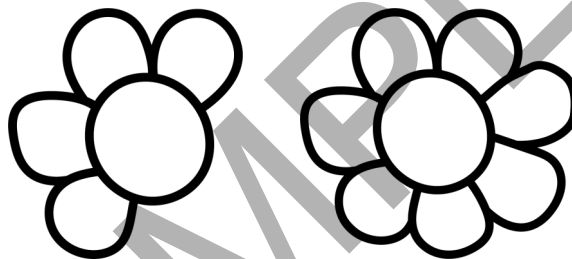

Draw a Daisy

Follow the directions below to draw a daisy on the next page. You can color your picture and the frame when you are finished.

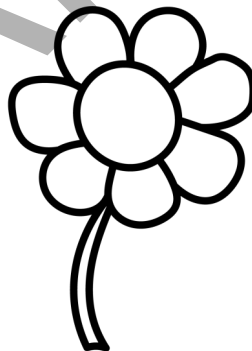

1. Draw a circle and make the first flower petal on it like the picture below. You can trace over this one first for practice if you like.

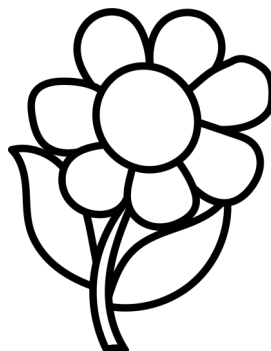

2. Keep drawing petals around the flower until you have drawn all the way around like the two pictures below. Remember that your petals don't have to be exactly the same size, but they should be close to the same size.

3. Now draw a stem on the daisy.

4. Last, draw leaves on the stem. The leaves can be anywhere on the stem you like.

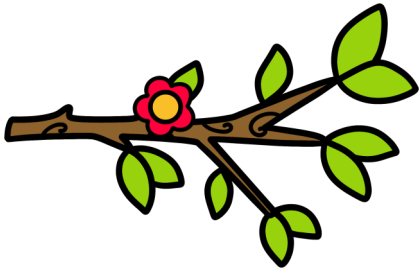

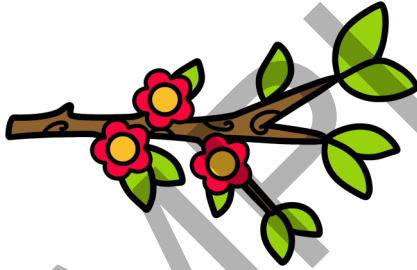

Flowers on Trees

Sometimes, trees bloom with flowers. This happens a lot with fruit trees. The flowers mean there will be lots of good fruit growing on the tree later in the year. Look at the pictures below. Count the number of flowers on the trees and write the number on the line below each picture.

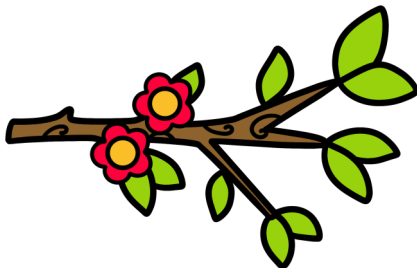

Finish the Picture

In the picture of the farm below, draw some bees in the trees. Draw some flowers starting to grow in the grass, and draw some children outside playing in the nice spring weather. What else can you think of that you can add to the picture? Draw what you think of!

Sequencing: Planting a Plant

Planting a flower or another type of plant is a lot of work. You have to:

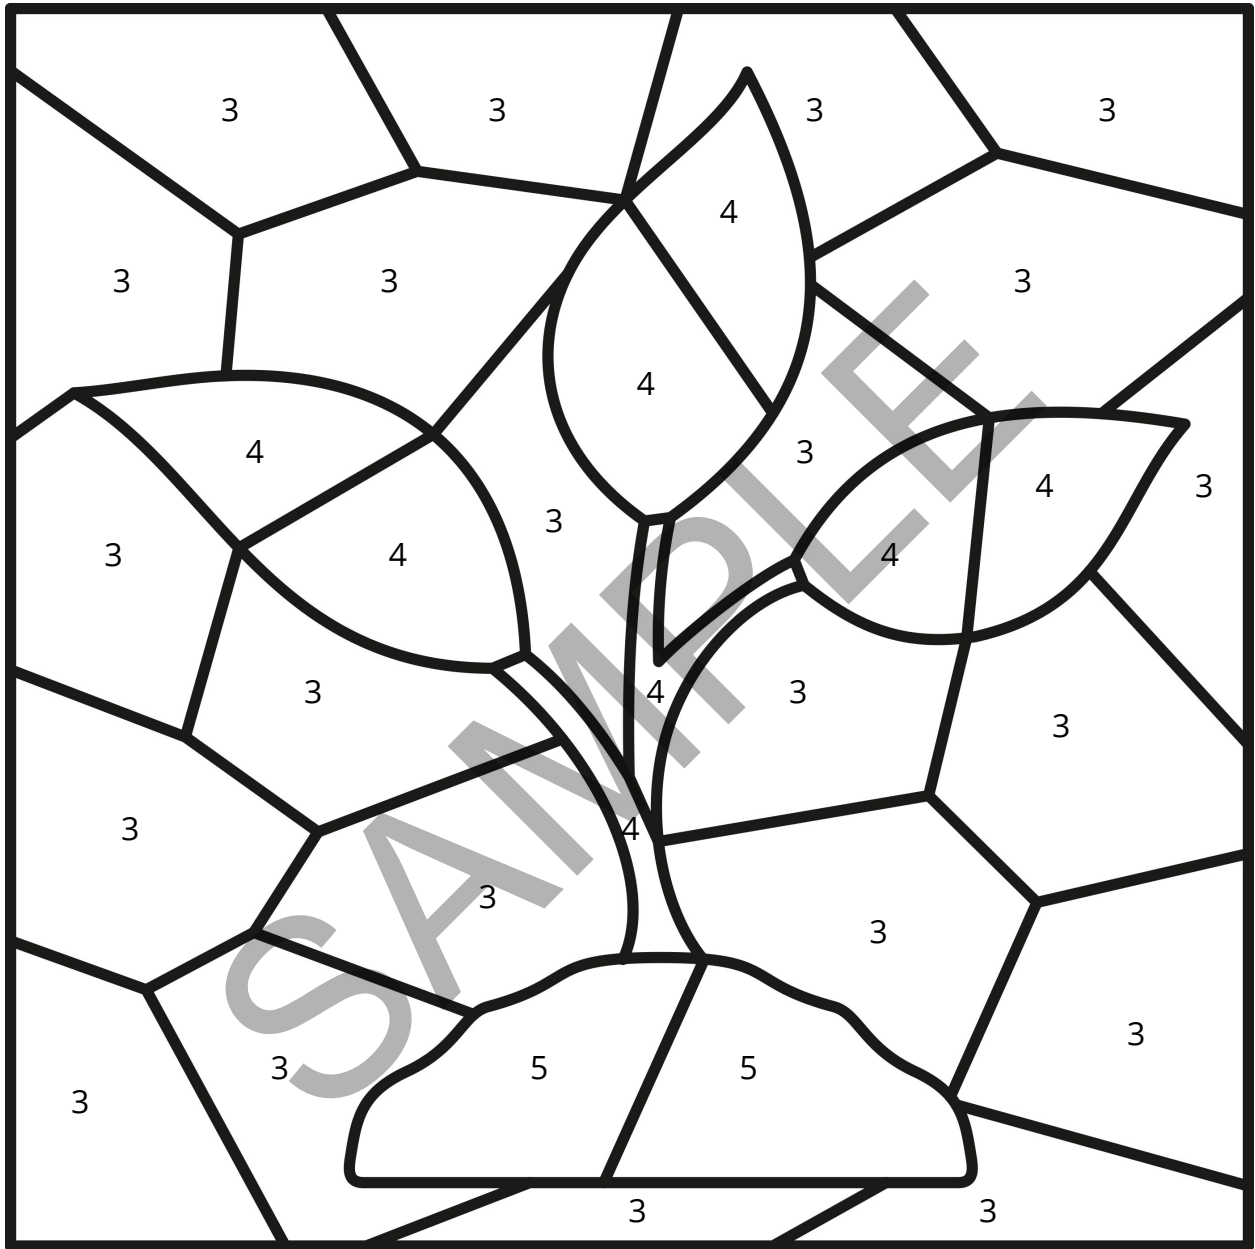

1. Dig the hole
2. Put in the seeds
3. Cover the seeds with dirt
4. Water the seeds
5. After a while, you will see your plants start to grow.

Look at the pictures at the bottom of the page. Cut out the boxes that show you how to grow a plant. Paste them in the right order in the numbered boxes.

1		2			
3		4		5	
 Put in the seeds		 Water the seeds			
 Cover the seeds with dirt	 Dig the hole	 See your plants start to grow			

Coloring With Rhymes

At the bottom of the page are directions that tell you how to color this picture. Find the number that rhymes with each picture to know what color to use.

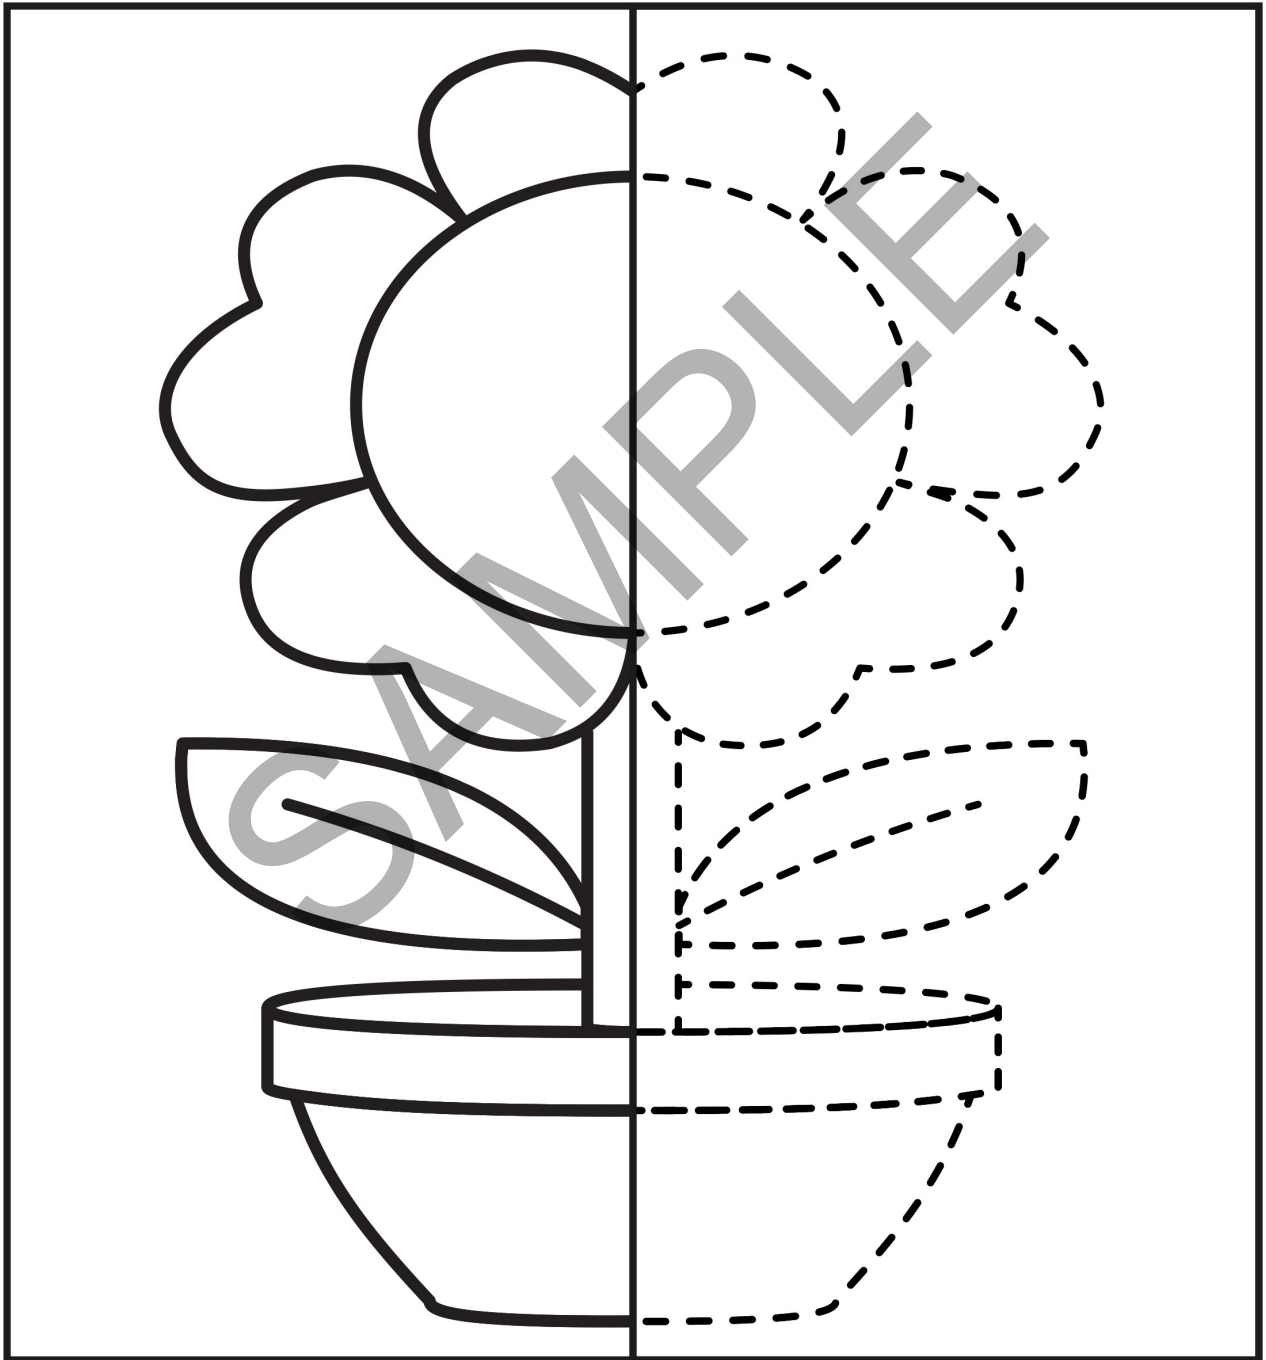

If the number in the space rhymes with , color the space blue .

If the number in the space rhymes with , color the space green .

If the number in the space rhymes with , color the space brown .

Finish the Drawing

Trace the dotted lines to finish the picture. While you are tracing, notice how the half of the flower you are drawing looks just like the half that is already finished. This is called symmetry. Symmetry is where one half of something looks exactly like the other half, just like it would in a mirror!

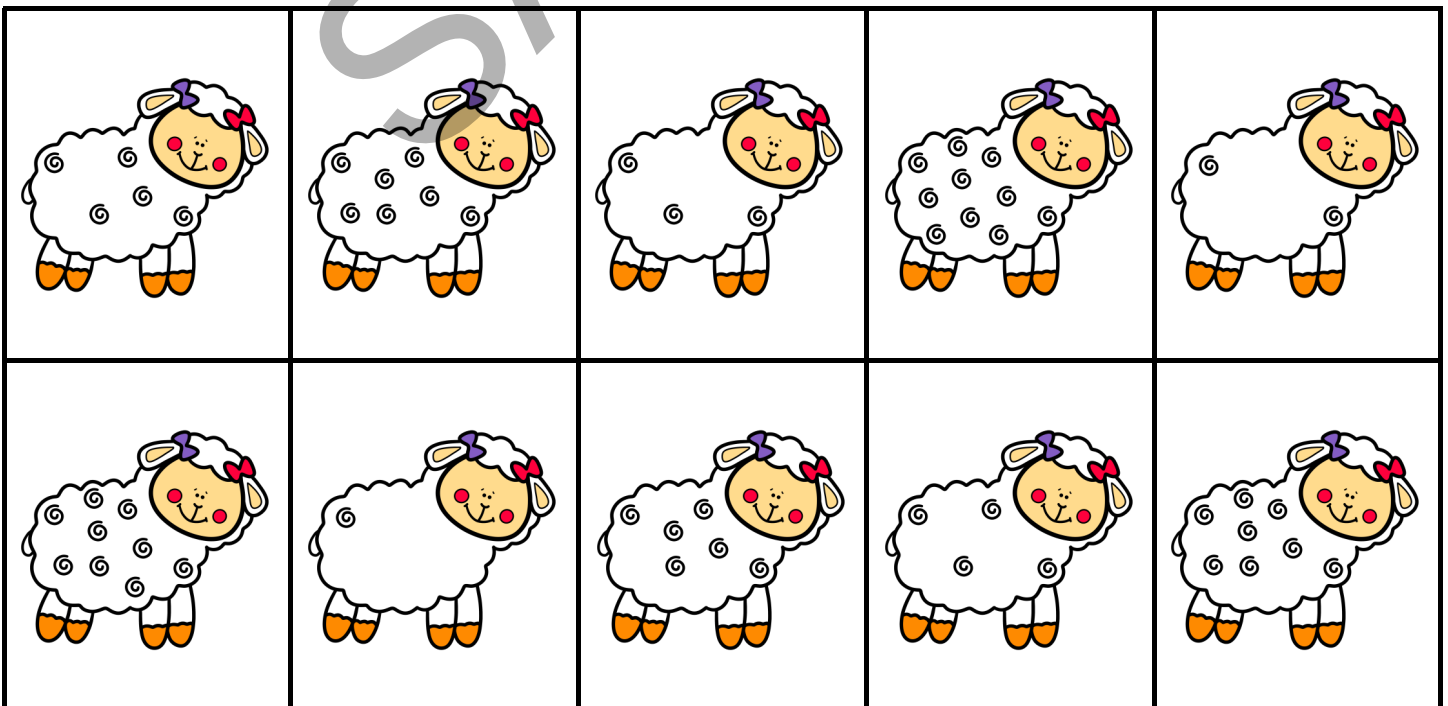

How Many Curls?

Look at the pictures below. Cut out the boxes with pictures of lambs. Count the number of curls each lamb has and paste each picture in the box with the matching number.

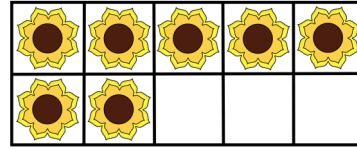

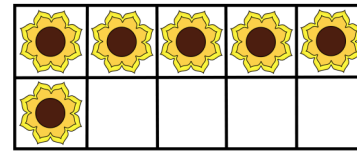

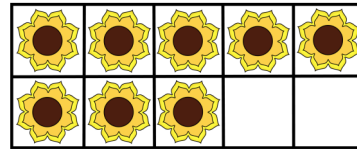

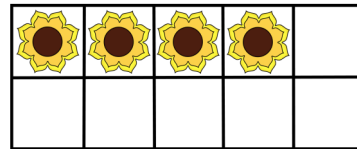

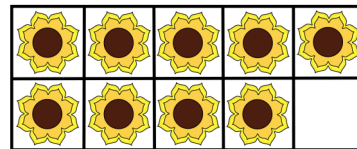

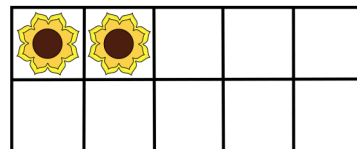

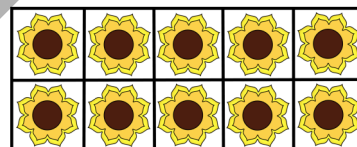

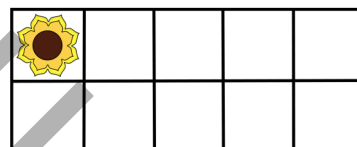

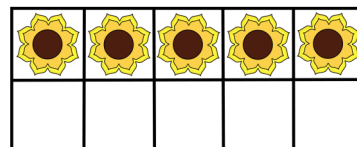

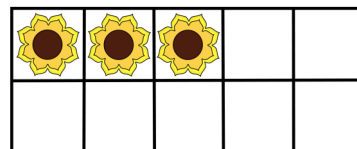

1	2	3	4	5

6	7	8	9	10

Match the Numbers

Draw a line to match the number on the large flower with the ten frame that has the same number of flowers in it.
