

Armand Frappier, 1904-1991

Frappier worked to
fight tuberculosis
and, with his
team, . . .

SAMPLE

freeze-dried blood

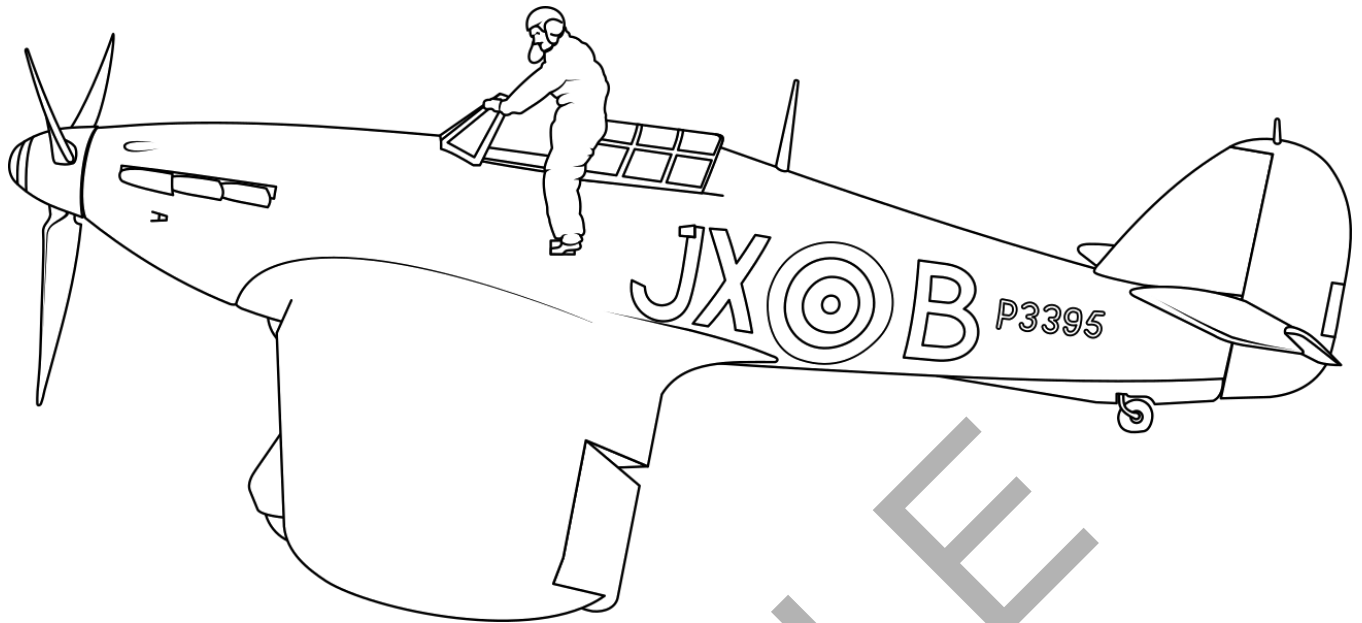

serum for the military

during World War II.

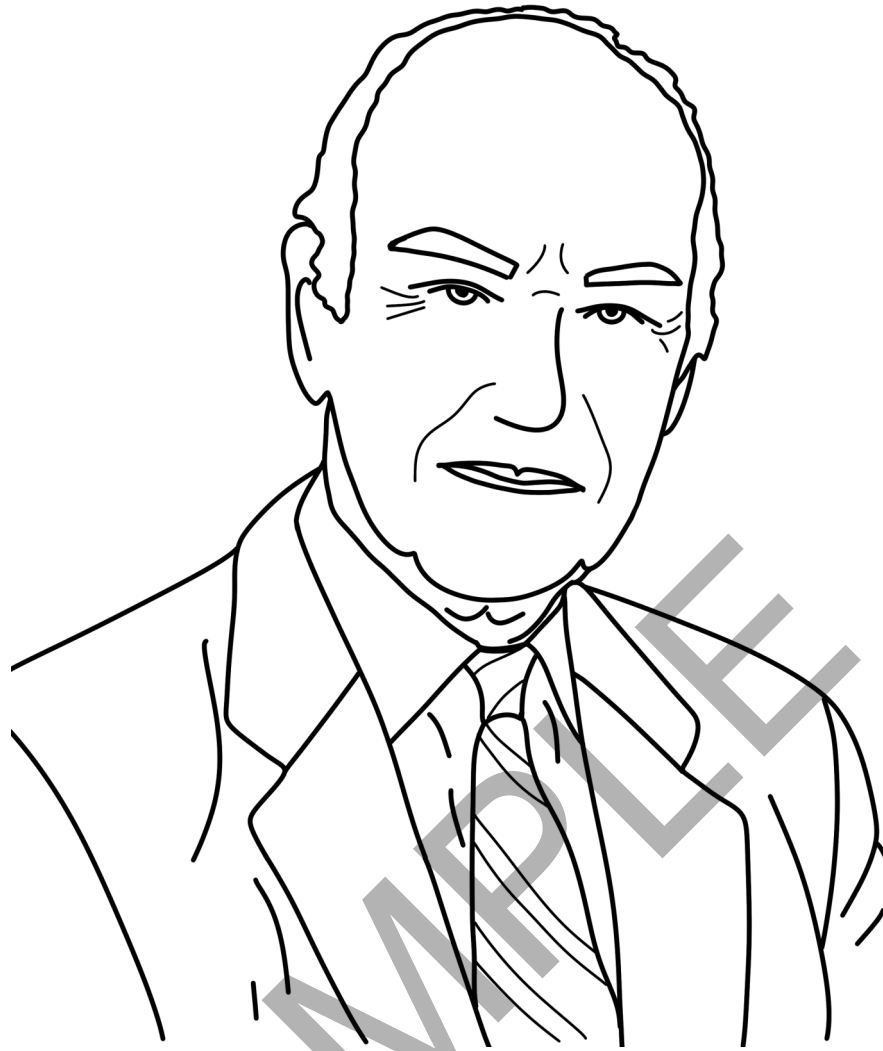

Elsie MacGill, 1905-1980

MacGill was the first
Canadian female to
earn a degree in
electrical engineering.
She helped with

new designs for planes
and was in charge
of production at the
Canadian factory
that built Hawker
Hurricanes used in
World War II.

John Tuzo Wilson, 1908-1993

Wilson studied the

movement of the

plates in the crust of

the earth, which can

cause earthquakes.
